EDUCATION

University of Northampton

Bachelor of Science in Computing, Software Engineering

Northampton, UK

Relevant Coursework: Databases, Web Programming, Software Engineering, Computer Communications, Computer Systems, Problem Solving and Programming and Mobile Applications

EXPERIENCE

E-Scooter Regulations Following GOV.UK Guidelines (Triad) – Project Manager

February 2024

Anomaly API for NHS Workshop (Access Group) – UI/UX Designer | *Figma*

December 2023

- Designed Wireframes and screen mock-ups with the use of Figma.
- collaborated with team members for precise and visually appealing screen mock-ups.

PROJECTS

Twitter Clone– Full Stack Developer | *React, Node.js, MongoDB, Express.*

April 2024

- Cloned the popular social media platform Twitter / X with the use of React, Node.js, MongoDB and Express.
- Implemented various user activity functionalities including follow, unfollow, posting, liking, and viewing.
- Developed and executed strategies to enhance user engagement and interaction on the platform.

Employee Management System – Full Stack Developer | *React, Node.js, Express, MySQL.*

October 2023

- Developed a comprehensive Employee Management System (EMS), with the use of React, Node.js, MongoDB and MySQL.
- Designed intuitive dashboards for visualizing real-time system performance metrics.
- Utilized advanced monitoring tools and technologies to ensure system reliability and scalability.

Speed Detection Camera | *Python, OpenCV, Jupyter labs.*

September 2023

- Designed and developed a speed detection camera system using OpenCV for accurate measurement of vehicle speed.
- Integrated speed calculation algorithms to precisely measure vehicle speed based on image processing techniques.
- Designed a user-friendly Graphic User Interface (GUI) for easy use, which contributed to the user satisfaction.

Job Website – Full stack Developer | *PHP, MySQL, Docker*

December 2022

- Implemented backend functionality for a job website, including user authentication, job listing management, and application processing.
- Developed APIs and database structures to support job listing features and user interactions.
- Managed job listings for users, ensuring accurate and up-to-date information for job seekers.

AWARDS & CERTIFICATES

- **J.P. Morgan** – Software Engineering Job Simulation.

TECHNICAL SKILLS

Front End: HTML, CSS, JavaScript, React.js

Designer Tools: Figma, Eraser.io, Pen pot.

Back End: Python, Node.js, MongoDB, MySQL, Java

Developer Tools: VS Code, Android Studio, Wix Studio
